# MATH MAGIC

THE TRICK:
PERCENTAGES SHORTCUT

HOW IT WORKS...

- **WHAT IS 40% OF 50?**
  4 X 5 = 20

- **WHAT IS 70% OF 90?**
  7 X 9 = 63

REAL-LIFE EXAMPLE:

IF YOU SEE A PAIR OF SHOES THAT YOU WANT AND THEY COST $60 BUT ARE ON SALE FOR 30% OFF, HOW MUCH WOULD YOU SAVE?

30% OF $60 = 3 X 6

= $18

HELPFUL FOR ESTIMATING DISCOUNTS
